100 Vaccines Before Age 18

100 vaccine doses by age 18?

The CDC's new recommendations for childhood immunizations include a minimum of 76 doses of 18 different vaccines.

But that number, if you include prenatal vaccines, could soar to 100-plus, depending on the formulations used, according to CHD's science team.

Can you make a donation today to help us stop the relentless medical assault on our children?

I think we can all agree, the government response to COVID was a catastrophic failure.

But what the masterminds of that response didn't count on was how spectacularly their unprecedented power grab would backfire.

We have a unique — but limited — window of opportunity to turn their failure into an unprecedented win for medical freedom ... ***especially for our children.***

COVID awakened tens of millions of Americans to the grim reality that a powerful industrial-military-pharmaceutical-censorship complex is dead set on dictating a one-size-fits-all prescription for our "health" — and *their profits*.

According to the CDC, less than 13.9% of adults got the latest COVID booster. A 2022 Gallup confirmed 75% of Americans now share negative opinions of Big Pharma and the federal government.

But what about our kids?

Children are vulnerable. They can't fight the ruthless, relentless attack on their tiny bodies.

But we can. And we must.

Like you, I'm grateful that so many adults whose livelihoods — and lives — were threatened by baseless vaccine mandates have joined the fight for medical freedom.

Whether you're an "old soldier" in this battle — or new to the fight — ***we need all of you in this movement to protect our children from a greedy pharmaceutical industry and their puppets at the CDC.***

Because while the COVID vaccine mandate crisis may have eased up for adults, ***tens of millions of kids still face dangerous, unjust school mandates every day***.

Please help us ramp up our work on all fronts — to use law, science, advocacy and education — to end the assault on medical freedom and **protect the health of our most precious resource — our children.**

Thank you for your support,

Mary Holland
